THE REGISTRAR

### *TO WHOM IT MAY CONCERN:*

*Steve GIDDIO, of SA Gutter Guard, became known to me when I asked several companies in South Australia to provide a quote to install fire resistant metal gutter shielding to the complete guttering system of my home in the Adelaide foothills.*

*Following various inspections and quotes I contracted him to do the job.*

*My impressions of a hard working and professional contractor were not wrong, as over several days in September, by himself, in weather that was not really conducive to this type of work, I saw him complete the tasks asked of him with no complaint. He did those extra little jobs, like a full inspection of the roofing system, minor repairs, cleaning of intrusive vines and provided extra fittings at no charge to allow me to replicate the protection of shedding gutters.*

*My wife and I were more than happy with the completed job, and the response to return if any problems were found.*

*We have recommended him to friends requiring this type of service.*

*I have no hesitation either, in recommending him to any potential employer who required the services of a hard working and professional employee.*

*Barry E. Presgrave. OAM, JP, LFAIES  
State President and Chairman  
Board of Directors ( SA, NT, WA )  
12th November 2009.*
